

Make your child's summer count!

Children Entering Pre K

This summer we will offer a customized program for children entering Pre K this Fall. During the morning hours we will focus on building your child's basic skills in conjunction with our weekly themes. In the afternoon hours, our campers will focus on fun and friendship with music, art, science and physical development.

Children Entering Kindergarten

Children entering Kindergarten in the Fall will take part in a camp specially designed to re-enforce the skills learned during Pre K that are vital to Kindergarten success. Camp will consist of an instructional, yet fun, morning session filled with phonological awareness, numerical awareness, language exploration, reading and handwriting. This will be followed by an action packed afternoon session that will include, art and music appreciation, science exploration, physical and social/emotional development.

School Age Children Kindergarten through 5th grade

Children who have already begun school will enjoy an action packed summer studying the continents of the world. Each week will concentrate on a different region of the world and will include weekly field trips, cooking, science, reading and math activities. Children will explore the cultures of the world through all of their senses. This exploration will help the children retain the knowledge they learned during the school year and help them bridge that knowledge to the next grade level. Each day will include a minimum of 60 minutes instructional time to help the children bridge to the next grade level.

The summer is broken down into 3 one week camps and 3 two week sessions. Pricing is based on attendance those entire weeks. Please see the office for special pricing for partial weeks.

Pricing

Camp Week I- 5/31 to 6/3

MMO- 8:30-12:30- \$100/week
Fulltime-6:00-6:30-\$169/week

**Includes our
amazing water
playground each week!**

Our summer camp program for kids entering Pre K this Fall through Fifth Grade offers enrichment, fun, friendship and a love of learning. Join us this summer as we travel around the world and learn the traditions of far off cultures. Each session will cover a different region of the world and will include enrichment activities, arts and crafts, music and more. Our program will encourage growth in social emotional well-being, phonological awareness, cultural appreciation, music and movement and physical development.
